ActivTec Solutions services the health care industry as Australia's largest distributor & importer of medical & mobility equipment spare parts while offering scheduled maintenance and repairs on a wide range of medical equipment. This catalogue displays spare parts for a broad range of medical equipment and is a vital resource for the smallest care facilities through to the largest hospital organisations in Australia. This catalogue was developed out of a need for medical facility maintenance personnel to have easy access to a large range of commonly needed spare parts for their mobility and general nursing equipment. Keep in mind when perusing this catalogue that the parts shown are by no means our entire offering, we have an extensive network of national and international suppliers meaning we have the capacity to supply almost any medical part required. Remember, "If you need it, we can supply it"

**If you need a part not shown in this catalogue please contact us,
we have many more parts available**

Are you sick of...

Reactive rather than proactive solutions suggested by service providers?

Equipment downtime due to slow contractors or lack of available parts?

Contractors that are always too unorganised to respond in a timely fashion?

Providers that want to sell you new equipment instead of just fixing it?

The ever increasing cost of equipment and facility maintenance?

Or do you simply want a second opinion?

BREAKDOWN SERVICE

ActivTec Solutions provides an emergency breakdown repair service with most repairs completed by our expert technicians on site. This ensures downtime is minimised and your equipment back in operation quickly, safely and cost effectively.

SCHEDULED SERVICING

Our preventative maintenance and asset management programs ensure clients equipment is maintained at optimal working condition at all times, reducing the exposure to untimely and inconvenient breakdowns and ensuring all accreditation criteria are met. All medical equipment in a high use environment should be scheduled for routine maintenance every six months as a minimum to prolong equipment lifespan to its maximum.

Our preventative maintenance programs will increase your regulatory compliance levels while delivering efficiencies right across your facility.

ActivTec Solutions designs facility-wide preventative maintenance programs centered around both your individual needs and relevant legislation and standards. Our preventative maintenance programs will increase your regulatory compliance levels while delivering efficiencies right across your facility. For example, your beds will be of a different brand to your hoists which will be different from your wheel-chairs, your shower commodes, your walkers etc. This complicated mix of brands and suppliers can potentially lead to confusion for your staff, inefficiencies in your systems and poor maintenance outcomes across the facility. ActivTec Solutions seeks to provide comprehensive medical servicing solutions to the progressive organisation in pursuit of continuous improvement.

Customers have access to a portal that provides a live view of their assets so they can see what equipment has been serviced on their site

- Service reports are monitored and kept in accordance with legislative standards and Quality Management System ISO 9001:2015
- We maximise your equipment's lifetime, thereby ensuring you get best value for money for each piece of equipment
- We maintain all equipment to the highest possible standard to lower the risk of injury
- We provide parts lists and free over-the-phone support to enable your current maintenance staff to attain higher productivity levels
- We work with our clients to deliver the most cost-effective maintenance solutions
- Our services provide a cleaner, safer and happier home and workplace
- We assign one service technician to look after each individual facility ensuring that the technician has the knowledge of the layout, equipment and personnel needed
- We provide and keep a clear record of service history for each piece of equipment
- All maintenance and repairs are performed to manufacturer's recommendations by a suitably trained technician with experience in the industry. The technician's performance is monitored in accordance with ISO 9001:2015 standards
